

APPLIED PEDOLOGY

The group deals with basic and applied research in the field of Soil Science, in particular:

- Soil classification and mapping (description and characterization of soil profiles)
- Soil evaluation for agricultural and forestry purposes (zoning and terroir)
- Hydropedology and soil erosion (models and scenario analysis)
- soil-plant and soil-pedofauna relationships

Key words: soil, soil degradation, soil functions

DISTAV personnel:

Academics: Ivano Rellini, Marco Firpo, Loris Galli

Collaborators: Eleonora Sessa

Grants:

Cinque Terre National Park, Portofino Regional Park, Liguria Region,
